Lono				Sacred to Kanaloa		
pole and torch fishing no planting						
← Sacred to Lono →						

Fig. 16. A typical month in the Hawaiian lunar calendar, beginning with Hilo, the night of the new moon. Each day has a specific name, some of them linking the day to a particular god (e.g., *Kū Kahi*, the first of four days *kapu* to Kū.) Work was suspended on days *kapu* to one of the gods; particular kinds of planting or fishing were recommended on other days in the lunar cycle.
